

PPW 1000 Portable Winch

SPECIFICATIONS:

This is a 1 Tonne line pull portable winch with a petrol driven engine built on a steel tubular frame with a structural main spine supporting the engine and reduction gearbox.

The winch is belt driven between engine and gearbox carefully concealed underneath the main frame, a hand lever and a clever friction device on the belt control drive to the capstan. Speed control is by engine speed with manual throttle.

The winch comes in **TWO** versions, 1) Light Cable Recovery Winch. (As shown above)
2) Cable Laying Winch c/w Reel Storage and layering system.

Both versions are supplied with an adjustable length boom brace, adjustable support legs and retractable handles for manoeuvrability.

Two removable side guards complete with interlocks cutting the engine when removed are standard.

Wheels are 200 mm Diameter pneumatic rubber tyres.

Engine: Honda 4 Stroke GVX 390 Petrol, Recoil Start, Air Cooled providing 10.2 Hp, 7.6 Kw (Net) of power at 3600 rpm and giving 17.8 lbs ft, 24.2 Nm of torque at 2500 rpm.
Fuel capacity is 2.1 Ltrs.

Safety: An emergency stop switch is provided at the operator position and the two side guards have interlocks providing engine shutdown.

Weights and Sizes:

Light Cable Recovery Winch:

Length: 1000mm
Width: 700mm
Height: 760mm
Weight: 125 Kgs

Cable Laying Winch c/w Reel Storage:

Length: 1400mm
Width: 700mm
Height: 760mm
Weight: 135 Kgs
